In approving the proposal by the Acting Chairman, NSRB, in the reference memo, the NSC directed (NSC Action No. 282) the Central Intelligence Agency, in collaboration with the Government agencies concerned, to organize and conduct a study of foreign economic intelligence requirements, facilities and arrangements related to the national security and, based on the findings of this study, to prepare for Council consideration and action a comprehensive plan for satisfying the foreign economic intelligence requirements of the national security and for a coordinated interagency effort to this end based on a definite allocation of responsibilities among the agencies concerned.

Pursuant to the President's direction, the Director of Central Intelligence was requested, on September 1, 1950, to prepare a report on the present status of this project.

On September 8, 1950, the Director of Central Intelligence reported that (a) a draft statement of requirements was undergoing internal CIA coordination to be completed by September 15, 1950; (b) preliminary surveys of Army, Navy and Air Force facilities relating to the production of economic intelligence had been received; and (c) plans in collaboration with the Bureau of the Budget were in preparation for a survey of governmental economic facilities outside the Defense Department.
